

With low equipment, operational, and maintenance costs, Air King industrial air cleaners are an economical way to improve your overall air quality.

Air King industrial air cleaners are a valuable tool for capturing most airborne nuisance particulate. Our self-contained filtration units continuously pull contaminated air through multiple stages of highly efficient micro-glass filters. The filtered air is then recirculated back into the working environment without the need for duct work. This results in a cleaner, healthier atmosphere for employees, while saving you money by keeping heated or air-conditioned air inside your facility.

APPLICATIONS

- Woodworking dust
- Grinding dust
- Environmental particulate
- Clay reclamation/silica dust
- Cigar/cigarette smoke
- Other smoke/dust contaminants

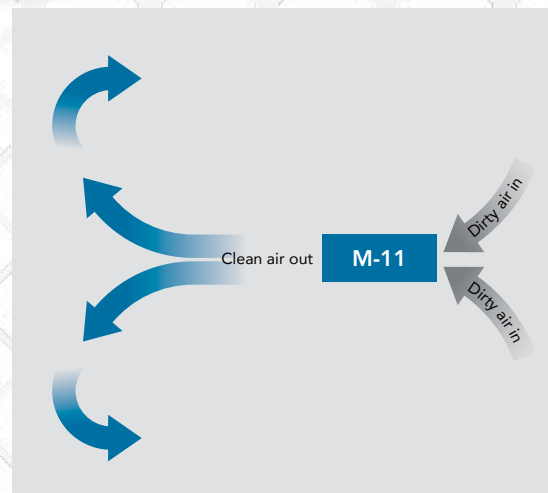

FEATURES

- Disposable filters
- Self-contained
- Easily relocated
- Four-way louvers
- 16-gauge, powder-coated construction
- Filter change indicator (optional)
- Multiple filter configurations available
- Easy installation and maintenance

SERIES M-11

The Air King M-11 series units are designed for use, individually or in multiples, in smaller spaces such as personal workshops, art studios, offices, smoking rooms, bars, or any area where dust, smoke or odor is a problem. The pass-through style configuration of these units has a single inlet on one end and exhausts the filtered air from the opposite end of the unit. In addition, each unit comes equipped with a variable speed switch to allow you maximum control of the airflow in your space.

The M-11 series features a one-inch washable foam industrial pre-filter, which catches the larger particles, extending the life of the second stage, Merv 15, multi-pocket bag filter. Our disposable filters are easy to service and provide for simple, low-cost maintenance.

SPECIFICATIONS	M-11 (Standard)	M-11CF (Charcoal Filter)	M-11CC (Charcoal Canister)	M-11HE (HEPA)
Dimensions	20"W x 15"T x 44"L			
Weight	95 lbs	100 lbs	135 lbs	125 lbs
Pre-filter	1" washable foam			
Primary Bag Filter (Merv 15)	(1) 95%, 24" 6 pocket bag (30 ft ²)	(1) 95%, 24" 6 pocket bag (30 ft ²) with (1) 2" charcoal after filter	(1) 95%, 12" 6 pocket bag (15 ft ²) with (1) 18lb. charcoal module	(1) 95%, 12" 6 pocket bag (15 ft ²) with (1) 12" 99.97% HEPA after filter
Volume (CFM)	1100 CFM	875 CFM	675 CFM	675 CFM
Motor	1/4 HP PSC with thermal overload; 115/1/60; 3.8 amps			
Blower	9 x 9 direct drive, variable speed			
Power	10' power cord, single phase			
Construction/Paint	16 gauge steel; gray chemical resistant powder coating			
Noise Level 5' dBA	48-65 dBA			

OPTIONS:

- Eyebolts (set of 4 - installed)
- Wall-mount bracket system
- Chain, Q-links, and eyebolts kit
- Cable, hangers, and eyebolts kit
- Pressure gauge/filter change indicator
- Silencer with 4-way louver
- Disposable, pleated pre-filter
- Needlepoint bipolar ionizer module

Air King industrial air cleaners have been manufactured in the U.S. since 1978. Sold through dealers throughout the United States and Canada, we have thousands of units in service. All dealers are supported by the factory with our readily available inventory of parts. Please contact your dealer with additional questions, or submit your information via our website at www.AirKingFiltration.com, and we will direct you to a dealer nearest you.
